Letter No 619 20 July 99 (3) The President of the L.S. Bds Improvement now states that the Bd of Hunsur consider the present water supply of the town to be partial & unsatisfactory

and propose to supply water to the people living in the eastern portion of the town on a higher level. The Cost of water supply by pumping for the upper portion of the town will be Cost Rs 8710 and the working expenses will amount to nearly Rs 4000 per annum. and the Board undertake are of opinion that they are able to pay the moiety of the Cost of Rs 8710 by annual instalments with 4 per cent interest along with the loan that remains yet unpaid.

The President adds that since the present Water Supply benefits only a minor portion of the people residing in the lower part of the

It is observed that the Sanitary Department incurred an expenditure of Rs 213-4-- in distributing filtered water to the town of

end of June 1898 and de-
bited the same in the
accounts of June to the
Municipality, but that
the President declined

From,

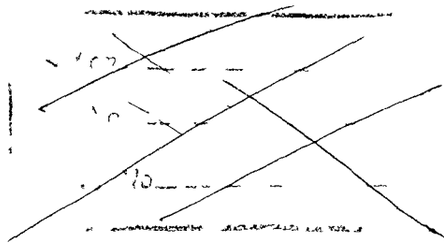
The Chief Engineer in Mysore;



To,

The Sanitary Engineer with Government.

Dated 6th February 1894.

General No 653-4
No 159-60

His No 1753 of 7th December 93 recommitting the water supply project for the Town of Yedatore with further particulars called for.

Forwards the enclosed general abstract prepared in this office including estimates for water supply Drainage and other sanitary improvements to the town of Yedatore, duly sanctioned by Government for Rs 15050 and informing that there is an allotment of Rs 5000 for the work in the Sanitary Budget of the current official year. Since sanctioned by Government. A detailed general abstract including all items should be submitted for record in this office.

In the estimate for "Laying Cast Iron Pipes" provision is made for "Earthwork Excavation" for pipe track for a length of 3177+ 360 = 3537 Rft which the actual length of pipes laying is only

water Tank up to Main Road"
which is shewn to be 2050 + 10 =
2060 R ft in the estimate; while
it ought to be 1870 + 460 = 2330 R ft
as shewn on the survey plan.

III. When channel is closed for silt
clearing water should be stored
in the small tank 10 miles above
the take off of supply referred to
in para II (2) of the Sanitary
Engineer's letter under reply.

IV. This work is a grant-in-aid one,
and a moiety of the cost will have
to be borne by the Municipality
of Jedatora; whose approval of the
proposed outlay should be obtained
if not done already.

By order,
(Initialled) H. C.
Secretary.
